UI/UX Track Project Proposal

ShopEase – Modern eCommerce Web Experience

Prepared by:

- Hany Abdalla Mohamed Ali
- Sohalia Ahmed Saber
- Rawan Hany Ibrahim
- Sarah Khalil Ahmed

■ Corporate & Professional UI/UX Project Proposal

■ Date: October 2025

1. Introduction

The ShopEase project aims to design an intuitive, responsive, and visually appealing eCommerce website that enhances the user's online shopping journey from discovery to checkout. The project will follow Agile Scrum methodology for iterative progress and continuous feedback.

2. Project Objectives

- Apply Agile Scrum principles to the UI/UX workflow.
- Design a modern and user-friendly interface.
- Ensure responsiveness and accessibility.
- Simplify checkout flow to minimize friction.
- Incorporate user testing after each sprint.

3. Target Audience

Target users include adults aged 18–40, professionals, and casual shoppers who value convenience, trust, and simplicity.

4. Agile Scrum Framework

The project will be managed using Scrum, dividing the design process into short, focused sprints. Each sprint delivers tangible outcomes and integrates feedback.

Sprint	Duration	Focus	Deliverables
1	Week 1	Research & Discovery	User interviews, competitive analysis
2	Week 2	Define & Ideate	Personas, journey maps, problem statements
3	Week 3	Wireframes	Low-fidelity layouts
4	Week 4	Visual Design	High-fidelity UI, style guide
5	Week 5	Prototype & Test	Interactive prototype, usability results
6	Week 6	Review & Presentation	Iterations, final showcase

5. Mock Visuals (Concept Illustrations)

The following visuals demonstrate the project's design concepts and Agile workflow representation:

Figure 1: Wireframe

Figure 2: Scrum Board (To Do / In Progress / Done)

Figure 3: User Journey Map Concept

6. Deliverables

- UX research documentation (personas, journeys, flows)
- Low- and high-fidelity wireframes
- Interactive prototype in Figma
- Usability testing results and iteration summary
- Agile Scrum board and sprint documentation

7. Conclusion

The ShopEase project integrates UI/UX principles with Agile Scrum practices to create a user-driven, iterative design process. Through continuous refinement and testing, the team aims to deliver a professional eCommerce prototype.
